Subject: Recommendation for Israt Tulin

Dresden, 14.01.2025

Dear Ladies and Gentlemen,

I am pleased to write this letter of recommendation for Israt Tulin, whom I have come to know as a reliable and dedicated student.

I had the opportunity to work with Israt starting in January 2023, when she undertook her master's thesis under my supervision. Her research focused on investigating pre-trained CNN models for pancreatic texture classification using IR spectroscopy images. The project required a solid foundation in data analysis, interdisciplinary collaboration, and careful evaluation. It also called for creativity in implementing ideas and attention to detail in interpreting results.

Israt approached the project with diligence and preparation, demonstrating steady progress over the course of her work. She was able to quickly learn the technical skills necessary for her tasks and, with guidance, conducted thorough experiments and analyses. She showed a good ability to understand new concepts and adapt to the practical challenges that arose during the project.

While the project presented significant obstacles, Israt consistently showed determination to address them. Her methodical approach and willingness to seek advice ensured that she stayed on track and contributed meaningfully to the project's outcomes.
